Accessories

This month is the introduction of our jewelry, accessories, rings and earrings line. We start with a few models like the Citroën Ami6, Mini Minor and the Volkswagen Beetle. In time, all our models will be available as rings and earrings. If a model is not yet available in the webshop, we can make it on demand for you.

Low_Res DS

The Low-Res DS serie is based on the simple idea that objects basically consist of many small two-dimensional triangles. When zoomed in on an object, you can see these triangles. In a low resolution version of such object, the triangles expand to a visible size. The combination of today's modern digitalized world with our 3D printing technology, allows us to generate any low-resolution file from a higher resolution file. The Low_Res DS is our first model in this concept. The Low_Res DS is available in scale 1:87.
